KRISHNA TANWAR

Gurgaon, Haryana, India | Mathura, Uttar Pradesh, India

+91 6395005796 kstanwar0000@gmail.com LinkedIn: in/krishnatanwars GitHub: github.com/KrishnaTanwars

Software Developer and Graduate Engineer Trainee at SMAAC Net Solutions with hands-on experience in software engineering, backend architectures, relational databases, enterprise ERP solutions, and business intelligence. Skilled in software development using Python, SQL, HTML, CSS, JavaScript, and Flask, with applied capabilities in Power BI data analytics, Star Schema modeling, REST APIs, and AI/ML architectures.

TECHNICAL SKILLS

- **Languages & Web:** Python, SQL (HackerRank Gold Badge), HTML5, CSS3, JavaScript, JSON
- **Backend & Frameworks:** Flask, REST APIs, Enterprise ERP (PEB Workflows), System Architecture, Microservices
- **Databases & Storage:** MySQL, PostgreSQL, SQLite, Star Schema Design, Normalized Data Modeling (3NF), Query Optimization
- **Data Analytics & BI:** Power BI, Microsoft Excel (Pivot Tables, VLOOKUP, INDEX/MATCH), DAX, Power Query, Pandas, NumPy
- **AI & Machine Learning:** LLMs, Retrieval-Augmented Generation (RAG), TensorFlow, OpenCV, YOLOv3, Whisper, Ollama
- **Tools & Methodologies:** Git, GitHub, VS Code, Linux/Bash, Streamlit, Plotly, Agile / Scrum, SDLC, Code Review
- **Core Coursework:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

PROFESSIONAL EXPERIENCE

Graduate Engineer Trainee (GET) — Smaac Net Solutions Pvt. Ltd. Sep 2026 – Present | Gurgaon, Haryana

- Contributing to software development lifecycles utilizing Python, SQL, MySQL, HTML5, CSS3, and Flask.
- Engineering enterprise ERP solutions and business process automation for the Pre-Engineered Building (PEB) industry.
- Designing and optimizing normalized relational database schemas, stored procedures, and backend data processing pipelines.
- Collaborating on cross-functional technical specifications, feature requirements, and modular code maintainability.
- Implementing secure API endpoints and structured data validation mechanisms to guarantee business data integrity.

Data Analyst — AtliQ Technologies Nov 2025 – Dec 2025 | Bengaluru (Remote)

- Delivered end-to-end Power BI and SQL business intelligence solutions addressing real-world enterprise requirements.
- Built 3+ interactive multi-page dashboards analyzing revenue streams, sales channels, customer demographics, and policy growth.
- Formulated and validated 20+ complex DAX measures (MoM growth, target variances, customer retention, sales performance).
- Cleaned, transformed, and modeled multi-table Star Schema datasets in Power Query, reducing reporting turnaround by 25%.

Data Analyst Intern — SkillCred Jun 2024 – Jul 2024 | Pune (Remote)

- Evaluated 50,000+ transactional and customer records using Advanced Excel, Pivot Tables, and visual analytics.
- Developed 3 interactive dynamic Excel dashboards tracking regional sales performance, conversion rates, and revenue trends.
- Executed data validation, ETL cleansing, and advanced formulas (VLOOKUP, INDEX/MATCH), reducing recurring report turnaround by 25%.
- Delivered customer segmentation analysis and KPI summaries to senior mentors for data-driven strategic planning.

Project Manager & Team Lead — Smart India Hackathon & Innovative Bharat 2023 – 2024 | Mathura, UP

- Directed 6-member cross-functional engineering teams in national hackathons, delivering data-driven solutions for government challenges.
- Spearheaded industrial sensor telemetry and IoT analytics at Innovative Bharat, designing structured data ingestion pipelines.
- Managed sprint planning, milestone delivery, architecture design, and final technical demonstrations to national evaluation juries.

KEY PROJECTS

RAG Based AI Teaching Assistant | Python, RAG, Whisper, Ollama, Vector DB GITHUB ↗

- Transcribes video lectures with Whisper into searchable knowledge chunks; generates vector embeddings with Ollama.
- Implemented context-aware semantic search returning timestamped query answers for rapid video explanation lookup.
- Integrated local LLM inference pipeline ensuring zero external API latency, reduced compute overhead, and complete data privacy.

Real-Time Video Analysis System | Python, Flask, OpenCV, YOLOv3, TensorFlow GITHUB ↗

- Engineered multi-class vision pipeline performing simultaneous human detection, vehicle tracking, and emotion recognition.
- Integrated deep learning inference models with an interactive Flask web dashboard displaying live bounding boxes and metrics.
- Optimized frame processing loops achieving smooth real-time throughput for multi-camera streams.

Smart Traffic Violation AI Platform | Python, YOLO, EasyOCR, JavaScript, SQLite GITHUB ↗

- Built automated vision platform detecting vehicle speed infractions and traffic light violations from camera feeds.
- Implemented automatic number plate recognition (ANPR) using EasyOCR and bounding box tracking with YOLO.
- Developed full-stack dashboard with SQLite audit logging, violation evidence reporting, and RESTful communication.

Sales & Customer Performance Analytics | SQL, MySQL, CTEs, Window Functions GITHUB ↗

- Evaluated 100K+ transactional records across customers, products, and markets using complex relational SQL queries.
- Developed 20+ business queries leveraging CTEs, Window Functions, self-joins, and aggregations for revenue and margin insights.
- Conducted market-level achievement benchmarking and customer ranking to identify high-value commercial growth opportunities.

Enterprise Business Insights 360 | Power BI, DAX, Star Schema, Power Query GITHUB ↗

- Architected enterprise Star Schema model integrating data across Finance, Sales, Marketing, and Supply Chain.
- Engineered 25+ dynamic DAX measures for time-intelligence, profit margins, and net sales KPI reporting.
- Replaced legacy manual spreadsheets with automated, interactive Power BI dashboards for executive decision-making.

CERTIFICATIONS & ACHIEVEMENTS

- **HackerRank SQL Gold Badge (5 Stars)** | • **1st Runner-Up — Data Analytics & Visualization Hackathon** (Smart Agrofarm)
- **SQL (Intermediate)**, **Problem Solving (Intermediate)**, **Problem Solving (Basic)** & **Python (Basic)** — HackerRank
- **Power BI Data Analytics 3.0** — Codebasics | • **Data Science & Analytics** — Cognitive Class
- **Applied Machine Learning in Python** — Coursera | • **Data Analytics with Python** — NPTEL

EDUCATION

B.Tech in Computer Science and Engineering (AI & ML) — GLA University, Mathura CGPA: 8.3 / 10 | 2023 – 2027

Class XII (Senior Secondary) — CBSE Board Percentage: 93% | 2022

Class X (Secondary) — CBSE Board Percentage: 95% | 2020
